

Farmer Ute Drive With Simon Falkiner

Simon is an independent consultant who has spent 30+ years transforming soils, using raised beds and subsoil techniques to improve structure, water holding capacity and Soil Organic Carbon. He works with Murdeduke Angus and is developing Australian Meat Merino's. Simon strives to improve on farm emissions through feed efficiency, productivity and sustainability.

Winnindoo

 **919 Ross Rd, Winnindoo**
 **Tuesday 2nd December**
 **9.30 - 11.30am**

Deep Ripping & Double cropping, Is it worth it?

Join Simon & Ton for a practical look at subsoil amelioration & double cropping in action. Check out the farming system changes in soil health & maize crop performance. Does the \$\$ translate? Do these techniques support carbon farming practices?

Giffard West Hall

 **3917 South Gippsland Hwy**
 **Wednesday 3rd December**
 **8.00 - 10.00am**

What to do when it doesn't work?

Join Simon & Trent for an open & honest discussion of what happens when deep ripping & soil amelioration doesn't provide the expected outcome. Tackling soil challenges and improving livestock performance both genetically and through pastures to boost feed efficiency across your farming system. What practices can you leverage to improve farm emissions and increase Soil Organic Carbon?
