PARTNERSHIP PROSPECTUS

SOUTHERN FARMING SYSTEMS MARKETING MIX STRATEGY

PLACE

We are the major provider of farming systems research and development in the high rainfall zone of southern Australia.

PRODUCT

Southern Farming Systems offers access to a captive and growing direct marketing audience. We have a growing membership of farmers and service providers, a large and varied supporter base and sponsorships approaching 50 companies and 1,000 individuals. SFS' exciting new web interface was brought on-line in September 2021, creating a growing audience of 15,000 new users and over 45,000 page views. SFS has 3,600 Twitter followers that grows daily. Furthermore, the SFS YouTube channel continues to have approximately 10,000 views annually with subscriber audience increasing by over 15% year on year.

PROMOTION

Communication stretches far beyond our supporter base through a comprehensive suite of advertising and promotional opportunities. Publications are produced throughout the year in a range of frequencies. These publications include books, e-newsletters, professional and focused videos, webinars, results ebooks, and social media. Major events are accompanied by demonstrations, field days and workshops, which can be streamed online in real-time and recorded for later viewing opportunities.

PRICE

The value of our partnership in advertising terms alone is a bargain. However, this is significantly enhanced by the focus of a direct marketing audience who highly value our organisation for its quality and independent advice. Supporting a non-for-profit member-based organisation creates goodwill with prospective clients and communities within the regions in which SFS operates.

CUSTOMISATION

We understand that having a wide variety of partners entails an equally wide variety of marketing needs. Equipment suppliers require large demonstration sites and business service providers may require greater web traffic exposure. We are more than happy to tailor a package to suit your individual needs.

TRIALS

Seed and product supplier's exposure to farmers is best maximised when insitu. SFS have cropping primary trial sites in South West Victoria and Tasmania, with a pasture trial site at Rokewood, Victoria. Major events are held at these locations. In order to hold a trial on a SFS primary trial sites, it is necessary to be a current patron partner as a minimum.
