

GRDC Harvester Forums

Tools, tips, tactics and technical advice to improve your performance in #Harvest2022

Local growers and advisors are invited to join us for a free half day harvester forum to share practices and hear from the experts on **harvest loss reduction, harvest weed seed control** and **prevention of harvester fires**.

This half day workshop will provide growers and advisors an opportunity to learn from others in their region about the different strategies currently being used to control harvest weed seeds as well as practical information about where to measure losses during harvest.

The forums will help growers get **more grain in the bin**.

TOPICS:

Improving harvester capacity and efficiency

Brett Asphar, Kassie van der Westhuizen

Understanding the impact of harvest loss, how to measure it and how to change your harvester to reduce losses

Peter Broley

HWSC latest information, sharing how to set-up for effective HWSC using mills systems (iHSD, Seed Terminator, SCU) chaff decks & chaff lining

Brett Asphar, Jana Dixon & industry demonstrations

Reducing the risk of harvester fires & grain storage

Ben White
